Ibrahim Faryssy Daouairi

SOFTWARE & CYBERSECURITY ENGINEER

+33 (0)7 58 68 74 14 | faryssy.ibrahim@gmail.com | linkedin.com/in/fdibrahim | Dijon, France

PROFESSIONAL SUMMARY

Python developer and security-adjacent engineer, graduate of Cy Tech (computer engineering, cybersecurity). Nearly 2 years of production Python delivery (50+ interactive exercises, 7,000+ students) and Linux ops: fullstack MEAN migration at GE Healthcare (~30% less complexity), application hardening, GDPR compliance ahead of the audit deadline, and automated deployments and backups. Cybersecurity background: penetration testing, reverse engineering, vulnerability analysis.

SKILLS

Programming: Python, JavaScript, TypeScript, Java, C, C++, OCaml
Frameworks & tools: Angular, Node.js, Express.js, React.js, Flask, Django, Spring Boot, MongoDB, PostgreSQL, Git, Docker
DevOps & systems: Linux (administration), deployment automation, monitoring, automated backups
Security & compliance: pentesting, reverse engineering, vulnerability analysis, application hardening, GDPR
Languages: French (native), Spanish (native), English (C1, TOEIC)

EXPERIENCE

Nest Style Valencia Hotel May 2026 - Jul 2026 · Valencia, ES
Receptionist & Technical Support
- First-line technical support: diagnosing hardware and software issues, prioritizing requests and tracking incidents through to resolution

GE Healthcare Jul 2025 - Dec 2025 · Buc, FR
Software Engineer (Internship) — *Medical imaging, Product Support team*
- Application security: fixed user-session vulnerabilities, renewed certificate authorities, achieved full GDPR compliance ahead of the audit deadline
- Fullstack migration of a legacy application to MEAN (MongoDB, Express.js, Angular, Node.js): codebase complexity reduced by about 30%
- Delivered 3+ new features; automated database backups (~4 h/week of maintenance saved)
- Automated server deployments (shorter release cycle, fewer production interruptions); designed the team's workflow

KWYK — Educational platform, 7,000+ secondary-school students Jun 2023 - Jul 2025 · Paris, FR
Software Engineer (Freelance, remote) · Sep 2023 - Jul 2025
- 50+ interactive Python exercises (French, maths, physics-chemistry), baccalaureate level, maintained in production for nearly 2 years

Software Engineer (Internship) · Jun 2023 - Sep 2023
- 10+ reusable exercise templates (fill-in-the-blank, crosswords, widgets); validators and usability in CSS & JavaScript; code review and unit tests

PROJECTS

E-commerce website — UML diagram, user account manager with JavaMail *(Java EE, Hibernate, MySQL, Spring Boot)*
Recipe blog — relational database, web interface *(PHP, HTML, CSS, JavaScript, MySQL)*

EDUCATION

Engineering Degree, Computer Eng. & Cybersecurity — Cy Tech (ex. EISTI) 2025 · France
Penetration testing, reverse engineering, vulnerability analysis, network security, cryptography, Java EE, C/C++/OCaml
Computer Science (Exchange) — Hanyang University, ERICA Campus 2024 · Ansan, South Korea
Preparatory classes (PTSI/PT) · Scientific Baccalaureate — Lycée Gustave Eiffel 2022 / 2020 · France
